

Filet crochet chart - open & filled blocks

24 blocks across x 24 block rows | 576 blocks

54 filled blocks | 522 open blocks

Method: rectangular 4-dc mesh, worked flat (US crochet terminology).

Each chart cell is one mesh block, not one stitch. Adjacent blocks share boundary posts.

This chart does not calculate stitch totals, foundation chains, turning chains, or yarn amounts.

FILLED BLOCK

A solid mesh block; X means filled.

OPEN BLOCK

An open mesh space; blank does not mean omitted fabric.

Begin with row 1 at the bottom, from the right edge.

Turned rows alternate direction. Read a whole global row across page sections.

The picture remains in a fixed front view; direction settings do not mirror the chart.

Print and page order

Sections run left to right in horizontal bands, starting with the bottom band.

Each block appears exactly once. Use the global column and row numbers at joins.

Print with Fit on Letter or A4. Square chart cells are symbols, not actual mesh dimensions.

Before working the chart

Make a small swatch with your chosen thread and hook. Review all open and filled edges.

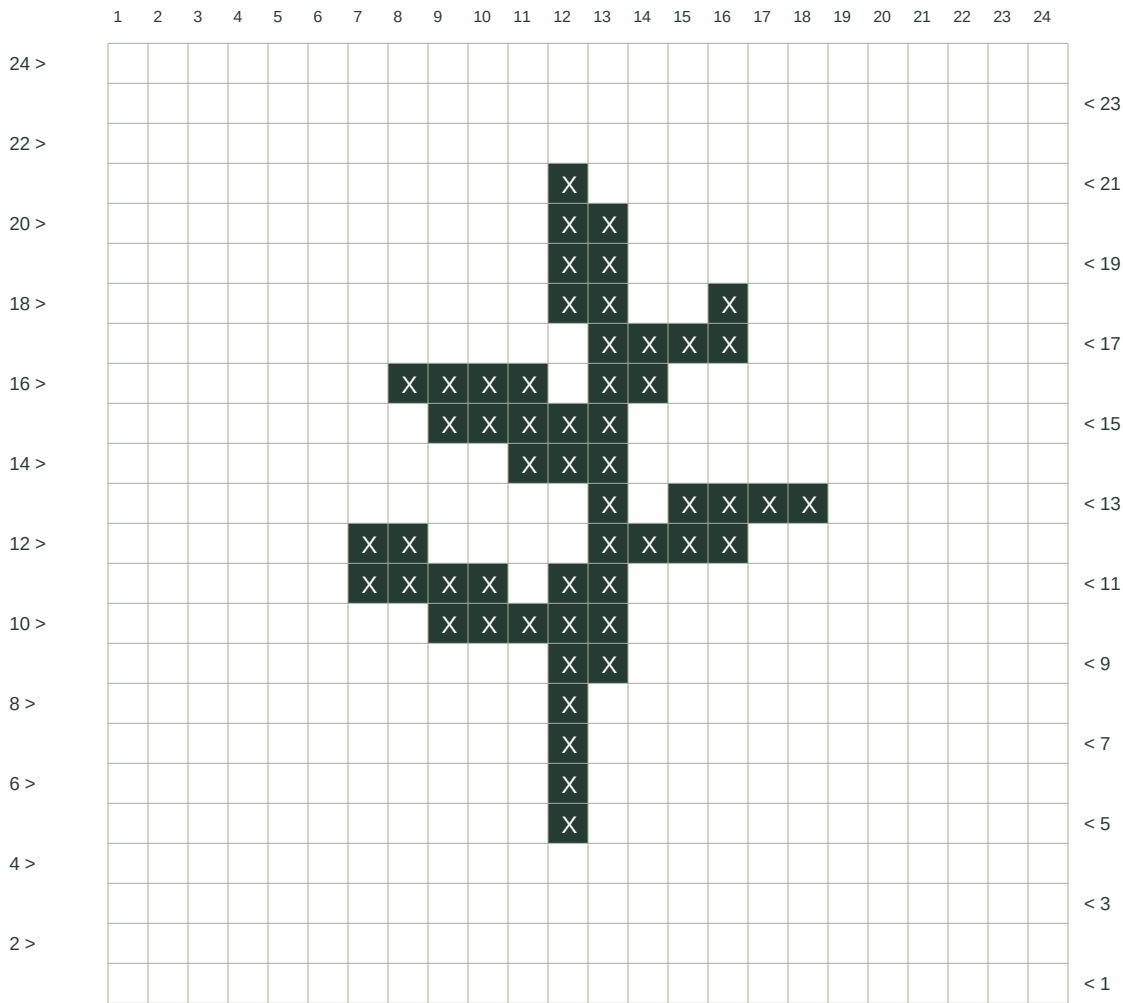

This is a digital draft. Physical validation by an experienced crocheter is still required.

No written row recipe, shaped edges, 3-dc mesh, lacets, or fancy mesh are generated.

Filet chart section 1 of 1

Block columns 1-24 | Rows 1-24 | Row 1 is at the bottom

54 filled / 522 open blocks in this section.

X = filled mesh. Blank = open mesh. A block is not a single stitch.

Follow the arrows for each complete row across sections; keep every page upright.

No duplicated edge columns or rows. Read method and limitations on page 1.

Square symbols do not predict physical mesh proportions. Print with Fit on Letter or A4.

Local draft / not physically swatch-tested.
