

Three poses to draw or adapt

Sitting cat

24 x 28 pixels - chart on page 2

Sleeping cat

32 x 20 pixels - chart on page 3

Walking cat

32 x 24 pixels - chart on page 4

READING THE CHARTS

Columns start at 1 on the left; row 1 is the top of the PNG canvas.

Copy the lettered cells. Unlettered cells have no pixel color.

The letters identify four shared swatches; they also work in a grayscale print.

These sheets are enlarged drawing references, not actual-size craft templates.

PERMISSION FOR THESE THREE DRAWINGS

Personal and commercial projects are allowed, including modified versions.

Credit is optional. You may include the cats in a finished project.

Do not redistribute the unchanged files as a standalone asset pack.

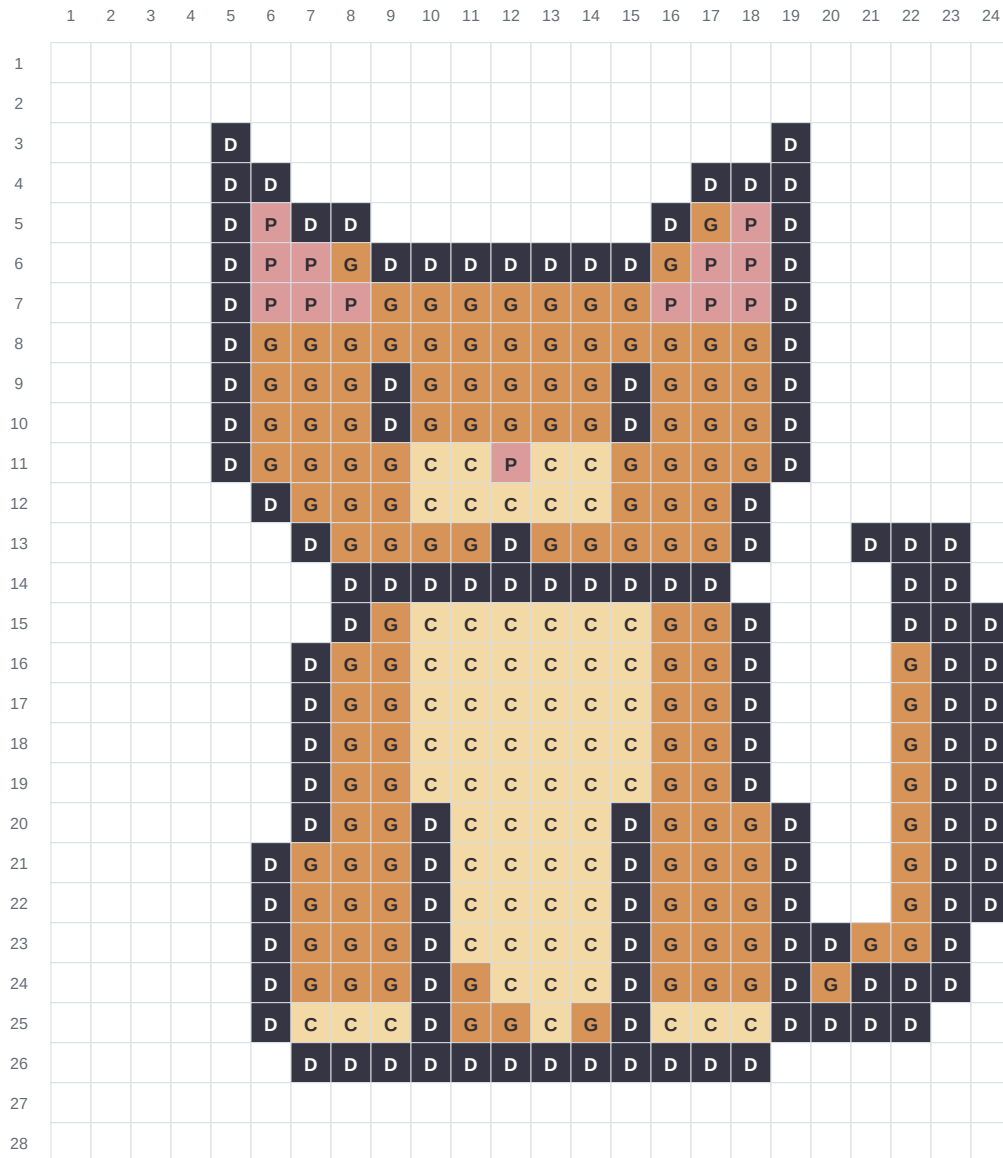

This permission does not cover other site artwork, branding or article text.

Keep the accompanying usage-permission.txt for the complete terms.

US Letter. Fit to the printable area on A4; grid coordinates stay the same.

Sitting cat

24 columns x 28 rows. Blank cells remain transparent.

D Dark outline #363543

G Ginger #D69458

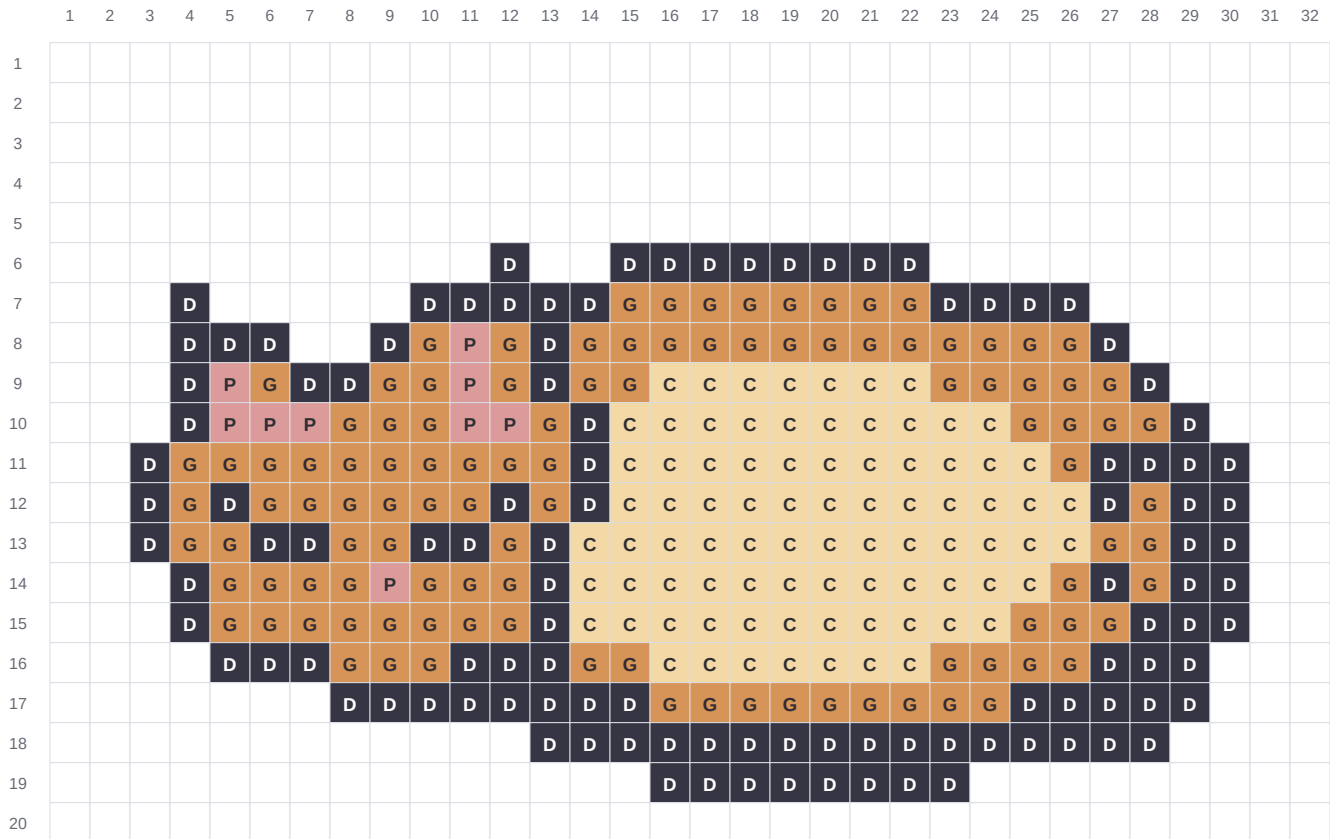

C Cream #F3D9A6

P Pink #DB9B9B

Keep the two eye marks in columns 9 and 15, on rows 9-10. The dark lines beginning at row 20 separate the forelegs from the chest.

Sleeping cat

32 columns x 20 rows. Blank cells remain transparent.

D Dark outline #363543

G Ginger #D69458

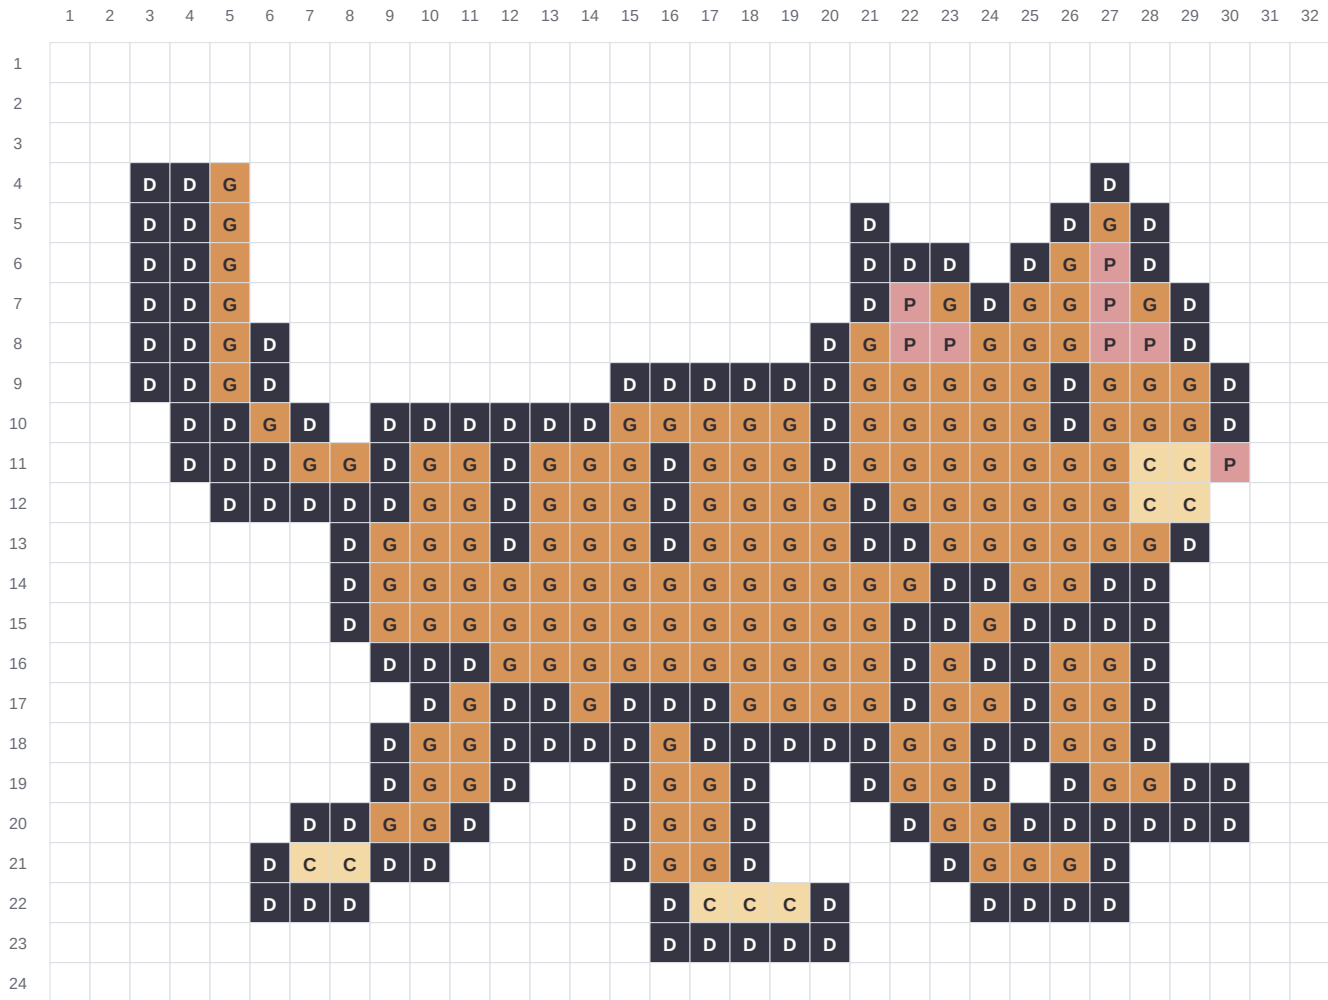

C Cream #F3D9A6

P Pink #DB9B9B

The eye marks step down into short horizontal lines rather than forming open dots. Preserve the dark boundary around the curled tail so it stays distinct from the belly.

Walking cat

32 columns x 24 rows. Blank cells remain transparent.

D Dark outline #363543

G Ginger #D69458

C Cream #F3D9A6

P Pink #DB9B9B

Copy the space beneath the belly as carefully as the legs. Joining all four paws with a filled horizontal strip would erase the stride.
